

Assignment 2 – Flask App with DB2 Connection

Given Task (Batch - B7-1A3E):

Create user table with e-mail, username, roll number and password. Connect Python code to DB2. Create a flask app with registration page, Login page, welcome page, By default load the registration page once the user enters all the fields, store the data in database and navigate to login page, authenticate user e-mail and password. If the user is valid, show the welcome page.

Code Samples:
